

DISX[®]

Delivering secure collaborative environments for SME's, Contractors and Defence Primes which enable seamless engagement with the MOD and other Government departments.

LOGIQ
CONSULTING

INNOVATE. COLLABORATE. DELIVER.

WHAT IS DISX®?

Logiq Consulting's Defence Information Secure eXchange (DISX®) is a rapidly deployable collaborative working environment that provides an out-of-the-box solution to Defence Contractors with a requirement to deliver into, and communicate securely with, the Ministry of Defence.

DISX® is designed to meet MOD and OGD security standards and delivers a highly cost-effective solution, compliant with Cyber Essentials, CE+ and the DCPD requirements.

Logiq Consulting have significant experience in designing secure networks specifically to meet the security standard required to hold HMG sensitive information.

The DISX® system is used to support the MOD and Defence Industry collaborate on sensitive projects allowing users to take advantage of an ever-evolving system that combines security, functionality and excellent customer support.

DISX® PROVIDES:

- A cloud-based system that will allow the secure storage and transfer of MOD Identifiable Information, including OFFICIAL-SENSITIVE data.
- Cloud and desktop applications that will provide secure email, office productivity and collaboration tools, including:
 - SharePoint
 - OneDrive
 - Teams
 - Desktop Productivity Apps
 - Secure Email
- Utilisation of customer specific DISX® email addresses
- Full Service Support, including support desk provision and ongoing System Security Management.
- Secure backup of Teams and SharePoint Sites, Exchange Mailboxes and OneDrive (daily).

FEATURES:

SYSTEM CAPABILITY

The system high-level architecture depicted as follows:

DISX® - KEY DELIVERABLES

Assured Security	Communicate and work collaboratively on a secure, affordable, and assured cloud platform to deliver OFFICIAL SENSITIVE outputs into MOD/Other Government Departments as well as instant, secure, email connectivity and access to the Microsoft Suite.
Scalability	Scalable, from 5 to 5000+ users
Rapid Deployment	First User Live within 4 weeks.
Flexibility	Cost effective pricing model to flex with the Client requirements based on user numbers and bandings. Accessibility to secure platforms at low or no CAPEX requirement. Flexible contract terms associated with project timelines
Seamless User Experience	Users are provided access to dedicated Secure Collaborative Environment with provision of hardened UAD or can utilise BYOD (phone/tablet) with access to standard Microsoft Office Suite.
Bespoke Planning & Delivery	Our specialist Security and Information Assurance experts work with the Client to establish current and future business requirements. A tailored service will be designed where appropriate.
Data Migration	DISX® enables migration of data from existing on-prem and cloud storage, into the secure collaborative environment. We will undertake feasibility and security assessments against migration requirements and minimise business impact.
Extensive Security and Support Service Management	DISX® is supported by a service desk between Monday to Friday, 9am to 5pm. Ongoing Assurance and Compliance casework is managed on the customer's behalf. Full change process, including security evaluation, to meet emerging requirements.
Compliance	DISX® has been configured to meet the requirements for Cyber Essentials and CE+ scheme along with DCPD requirements. DISX® is permitted to store/process OFFICIAL information, including with the SENSITIVE caveat.
