

DISX[®] AIR

SECURE, STREAMLINED
COMMUNICATIONS WITH DEFENCE

LOGIQ
CONSULTING

INNOVATE. COLLABORATE. DELIVER.

WHAT IS DISX AIR?

Logiq Consulting's Defence Information Secure eXchange (DISX®) is a rapidly deployable working environment that provides an out-of-the-box solution to Defence Contractors with a requirement to deliver into, and communicate securely with, the Ministry of Defence.

Designed and developed from the ground up and built upon our ethos of innovate, collaborate, deliver - DISX is designed to meet MOD and OGD security standards and delivers a highly cost-effective solution, compliant with Cyber Essentials, CE+ and the DEFSTAN 05-138 requirements.

Logiq Consulting have significant experience in designing secure networks specifically to meet the security standard required to hold HMG sensitive information.

The DISX system is used to support the MOD and Defence Industry collaborate on sensitive projects allowing users to take advantage of an ever-evolving system that combines security, functionality and excellent customer support.

WHO IS IT FOR?

DISX Air is a streamlined solution to meet the requirement of the current users of a legacy, end-of-life service enabling Official tier communications with accounts for up to 3 users sharing a single physical device.

Providing seamless direct connectivity into MOD Secure Services and the r.mil.uk mail domain, DISX Air also offers M365 web apps, internet browsing, printing and major document storage and viewing options as standard, offering not only enhanced functionality, but maximum collaborative productivity.

DISX Air ensures the continuation of MOD and OGD communication without requiring integration into day-to-day IT systems while simultaneously enabling contractors to quickly pivot to a new system, a system that goes beyond like-for-like, boasting familiarity and ease of use, all backed by Logiq's accredited industry expertise and support.
